

## DADAS WEATHER APP FOR SMARTPHONES AND TABLETS

DADAS WEATHER APP is a very flexible and user friendly application software for smartphones and tablets. These apps are a new addition to the DADAS family of MetOcean software products that can be configured to a multitude of different applications.

DADAS WEATHER APP can be used for displaying and reporting as well as for controlling other units or processes. DADAS WEATHER APP is available both in Android and iPhone versions and are available for download through normal download channels.

The Weather Data can be stored at the owners own server or at A+D's server or other public servers for easy access. A log-in page will allow the system owner to control access and availability to the data.

Please contact A+D to discuss specific applications or solutions.
